## CAMPAIGNING WITH THE SCOTS

by Gregory Lauder-Frost

---

Scotland's six hundred years of wars seen through the eyes of a great Lowland family (the Lauders).

*Some reviewers' comments:*

"A brilliant history of one of those ancient patriotic landed families eclipsed by 17th century corruption".

"Looking at Scottish history through the eyes of an important lowland family gives one a perspective not unlike the effect of reading an individual biography. A useful insight which a standard history of the period and region would not give."

"...a panoramic view of Scottish history which has also included a large amount of family history, allowing a powerful consideration of the importance of loyalty and chivalry over treachery and deceit."
